

SUMIT YADAV

NIT Delhi, India | sumityad172@gmail.com | linkedin.com/in/sumityadav-1663613bb | github.com/sumit2k5

EDUCATION

National Institute of Technology (NIT) Delhi

Delhi, India

Bachelor of Technology in Computer Science and Engineering – **CGPA: 7.55/10.0**

Aug 2024 – Dec 2028

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Discrete Mathematics

EXPERIENCE

Elevance Skills

Remote

Full Stack Developer Intern

Mar 2026 – Sept 2026

- Contributing to design and development of scalable web applications using React.js, Node.js, Express.js, and MySQL in an agile team environment
- Developing and maintaining RESTful APIs, implementing authentication flows (JWT, Google OAuth), and participating in code reviews for production-grade codebases
- Collaborating with cross-functional teams on feature development, UI/UX improvements, and deployment pipelines using Git and modern dev tooling

Open Source Contributor / Personal Projects

Remote

Independent Developer

2024 – Present

- Actively building and maintaining full-stack web projects hosted on GitHub, focusing on clean code architecture and documentation
- Exploring system design principles, solving DSA problems, and participating in college hackathons – **HackIndia Spark 6** (Qualified Round 2)

TECHNICAL SKILLS

Languages: C, C++, JavaScript (ES6+), PHP, SQL, HTML5, CSS3

Frontend: React.js, Vite, Redux, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, PHP, REST APIs, JWT Authentication, Google OAuth, Session Management

Databases: MySQL, MongoDB, Mongoose ODM

Tools & Platforms: Git, GitHub, VS Code, Postman, Netlify, npm, Arduino IDE

Concepts: Data Structures & Algorithms, OOP, DBMS (Normalization, Transactions, Concurrency), Client-Server Architecture, System Design (Basics), MVC Architecture

PROJECTS

College Voting System | C, CGI, Node.js, Express.js, MySQL, HTML, CSS, Netlify

2025

- Developed a secure college-level voting platform with backend logic implemented in **C using CGI-based server architecture**, supporting **500+ concurrent users**
- Built Node.js/Express.js middleware layer for efficient request routing between CGI backend and responsive frontend; deployed on **Netlify**
- Implemented robust authentication and vote validation mechanisms ensuring data integrity, preventing duplicate voting, and reducing result computation time by **60%**

Sports Event Management System | PHP, MySQL, HTML, CSS

2025

- Designed and developed a comprehensive database-driven sports event management system, reducing manual paperwork by **80%**
- Implemented complete **CRUD operations** using PHP for backend logic with MySQL; applied **normalization (3NF)**, foreign key constraints, and complex SQL JOINS
- Created admin dashboard for event scheduling, participant registration, and real-time score tracking with automated leaderboard computation

Canteen Management System | React.js, Vite, Express.js, Google OAuth, MySQL, HTML5, CSS3

2025–26

- Built a full-stack web application for canteen order management, inventory tracking, and billing automation, reducing order processing time by **40%**

- Implemented **Google OAuth** and session-based authentication with input sanitization to prevent SQL injection and XSS attacks, ensuring end-to-end security
- Applied DBMS concepts including **transaction management** and stored procedures for automated stock alerts; designed scalable relational schema
- Built responsive React frontend with Vite build tooling, replacing paper-based workflows with a streamlined digital order pipeline

EXTRACURRICULAR ACTIVITIES

Hackathons: HackIndia Spark 6 – Qualified for Round 2 out of 10,000+ participants nationwide

Core CS: Actively solving Data Structures & Algorithms problems on LeetCode and Codeforces to strengthen problem-solving for technical interviews

Interests: Full-Stack Web Development, Open Source Contribution, Competitive Programming, Embedded Systems & IoT
